Permanent:

P.No-49, Shree Ram Nagar
Colony Goner Road Luniyawas Jaipur-302004(Rajasthan INDIA).

Breif Overview:

- Can efficiently build web applications end to end using MEAN Stack
- Have experience into designing the architecture for MEAN Stack applications from scratch.
- Worked on End to End Application building in a microservice architecture.
- Worked on Progressive Web Apps using Angular.

Education:

- Master of Computer Applications (2014-2017) from National Institute of Technology Kurukshetra (INDIA) with 8.23 CGPA.
- Bachelor of Computer Applications (2011-2014) from University of Rajasthan(INDIA) with 71 %.
- 12th from CBSE(INDIA) with 74.8%.
- 10th from CBSE(INDIA) with 58%.

Technical Skills:

- Programming Languages: C,C++,Java.
- Database: MySQL, MONGODB
- Web Technologies: HTML,HTML5, CSS3, Bootstrap3, Bootstrap4, JavaScript, ReactJs, TypeScript,AngularJs,Angular2+,RestFul API, NodeJS.

WORK EXPERIENCE:

DHL IT SERVICES(Oct 2021 - Present)

SOFTWARE ENGINEER PROJECT

D-Apps(TranSpare/TransModel/TransAir)

These web application related to the Track and trace solution for one of the most popular German Automobile OEM which Includes tracking of spare parts shipped by various logistic companies across the globe and providing data transparency and real time updates to all the stakeholders involved in the system using blockchain. Blockchain based multiple application development for German based logistic giant for some of its customer. This includes the tracking data of Goods, custom handling , performance tracking, air cargo booking and tracking etc.

Technology Used: Angular 12, NodeJs, NestJs, RDBMS , ORM , Graphs.

Roles and Responsibilities:

- Working on the new features integration of D-Apps.
- Migration from Generic DB to RDBMS for few apps.
- Improving the build process based on the client.
- Converting the new wireframes to UI Screen.
- Writing Rest API for the new features.

HATI INERNATIONAL SDN BHD(Formerly SD Global Technologies)(Aug 2020 –Oct 2021)

**TECHNICAL ANALYST
PROJECT**

MEDCARE/ CLINICARE

These product is for the Health Care industry which offer a wide range of functionality to Corporate Hospitals, Private Hospitals, and Smaller Hospitals. Making the process smooth and online, From creating the encounter for patient till the patient is finished making bill payment for diagnosis.

It helps hospital management to tracks all the activity more smoothly ,and doctors to make calls for the patient on button clicks.

Technology Used: Angular 7, 8, AngularJS NodeJs, MongoDB, HTML 5, CSS 3, REST API.

Roles and Responsibilities:

- Interacting with different teams for the requirement and understanding of business logic.
- Working the new requirements and fixing bugs for the existing project.
- Deploying the services and frontend code over different environment.
- Interacting with the QA teams for testing the application and if bugs arises fixing them.

CATCH THAT BUS SDN BHD (SEPT 2019 TO JULY 2020)

**FULL STACK ENGINEER
PROJECT**

DriveIT

Tan Chong Motor Holdings Berhad is a Malaysia-based multinational corporation that is active in automobile assembly, manufacturing, distribution and sales, but is best known as the franchise holder of Nissan vehicles in Malaysia. The corporation has many sub companies, dealers and branches below it. The application is required to maintain the data right from sales of vehicles to subsequent services. It is a one place application for almost all the operations performed by Tan Chong Motors.

Technology Used: Angular 7, 8, NodeJs, NgRx, Store, MySQL, HTML 5, CSS 3, REST API.

Roles and Responsibilities:

- Interacting with business teams for the requirement and understanding of business logic
- Creating the reusable/sharable component in angular 7,8 form UI/UX Mock-up Screen and writing the backend services for the applications and integrating them together for successful completion of modules.
- Deploying the services and frontend code over different environment.
- Interacting with the QA teams for testing the application and if bugs arises fixing them.

INNOMINDS SOFTWARE PVT LTD. (SPET 2017 TO AUG 2019)

- Associate Engineer (UI Practice).
- Worked on various ReactJS, Angular 2+ Projects.
- Developing Platform : Visual Studio Code.

Projects:

- **Bright Sign:** An interactive kiosk for marketing the Amazon products like Amazon Alexa, echo, echo bees etc. that will be used in the different stores.

Role and Responsibilities:

- Writing and Testing Bright Script API and debugging.
- Making Digital presentations in bright author and publishing it over devices and testing presentations.

Technology Used: React JS, Redux, Flux, HTML 5, CSS 3, Typescript, Bright script.

- **Nvidia Licensing 1.0:** An Nvidia web Application that deals with the different roles a customer can have and updates their preferences and accounts.

Role and responsibilities:

- Working on the Wireframes and UX screen and creating the sharable component in angular.
- Interacting with clients for requirement gathering.
- Working with backend teams for completing the modules and integrating all components together and making sure they are working as expected.

Technology Used: Angular 5,6, HTML 5, CSS 3, RESTAPI ,Bootstrap

- **Entersekt-ADFS PLUGIN:** OpenAM protected application access using new Entersekt 2FA mechanism. ADFS protected application using access using Entersekt 2FA mechanism. In this application while login each registered user will have to perform OTP/Push Notification credential along with ADFS authentication while accessing protected application.

Role and responsibilities:

- Working on the Mockup/UX and converting them to proper components in angular 4.
- Building reusable components and code optimizations.
- Deploying new features and added by clients.
- Working with backend team to deploy the resolving error which are we encounter during the integrations on applications.

Technology Used : Angular 4, HTML 5, CSS 3, Bootstrap,
